Subject: Legal Question

Mr. Panchaud,

I took your class sir at Northwest Florida State College. My name is Stephen Usry and after I've discussed my concerns with Instructor Hough his guidance was file a complaint or talk with an officer from Santa Rosa. My issue is that another student who works as a civilian at the Santa Rosa Jail told me that he had looked me up (I believe with his work computer from the details he had given me). He said that nothing had pulled up on me. Then he went into detail about a police report that dealt with sensitive information from my past. The report was from my father hitting my mother when I was ten years old. I did not give him consent to look me up. I did not appreciate the fact the he knew so much from the report because he must have studied it from the information he gave me off the top of his head. My question sir is there a way the jail would be able to see a log if he had performed a search for my name? Is this something worth going after or is this something that happens often such as identity theft? I understand you're busy sir but I would appreciate some advice from you Mr. Panchaud. My phone number is 850-549-7630.

Very Respectfully,  
Stephen Usry
